NERGRIT

NERGRIT is machine learning based NLP Tools used for Indonesian Named Entity Recognition, Statement Extraction, and Sentiment Analysis. This is the corpus we made and have `F1 score` with using `glove` as follow:

- Named Entity Recognition: ~ 80.00%
- Statement Extraction: ~ 70%
- Sentiment Analysis: ~ 75%

How to Use

Better use Python 3 and use your GPU instead of CPU for training, and run the following on your OS:

```
pip install virtualenv
```

Virtual Enviroment for `NER` and `Statement` using Anago version 1.0.8 :

```
cd nergrit-corpus
mkdir venv
virtualenv venv
source venv/bin/activate
pip install anago
```

Traning the model for `Name Entity Recognition (NER)` with:

```
cd ner/
python make_model.py
```

Try the model with:

```
python tag.py
```

Traning the model for `Statement Extraction` with:

```
cd statement/
python make_model.py
```

Try the model with:

```
python tag_statetement.py
```

Virtual Enviroment for `Sentiment Analysis` using Anago version 0.0.5 :

```
cd nergrit-corpus
mkdir venvold
virtualenv venvold
source venvold/bin/activate
pip install anago==0.0.5
```

Traning the model for `Sentiment Analysis` with:

```
cd sentiment/
python make_model.py
```

Try the model with:

```
python test_data.py
```

If You demand the model to be optimized more, you can create `glove` from wikipedia Indonesia or any Indonesian articles.
